

Decision support systems in the twenty-first century, 1999, 506 pages, George M. Marakas, 013744186X, 9780137441860, Prentice Hall, 1999

"A survival guide for business management professionals, this valuable book helps users learn to make and support managerial decisions wisely and successfully, providing a thorough understanding of the support aspect of DSS. Packed with essential information, it is written from a cognitive processes and decision-making perspective, concentrating on issues that emphasize managerial applications and the implication of decision support technology on those issues." Provides a strong managerial application and use approach throughout, with a "real-world" orientation that emphasizes application and implementation over design and developments in all topic areas. Offers extensive coverage of decision-making theory (decision styles, decision effectiveness, cognitive processes, and organizational culture), and contains full chapters on data mining, data visualization, and creative decisions and problem-solving. A real-life Mini-Case opens each chapter, and concepts are supported throughout with extensive visuals and examples.
